| Operating ambient temperature max.  | °C | 60   |
|---|----|--|
| IEC/EN 61439 design verification  |    |  |
| 10.2 Strength of materials and parts  |    |  |
| 10.2.2 Corrosion resistance   |    | Meets the product standard's requirements.   |
| 10.2.3.1 Verification of thermal stability of enclosures  |    | Meets the product standard's requirements.   |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat  |    | Meets the product standard's requirements.   |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects $$ |    | Meets the product standard's requirements.   |
| 10.2.4 Resistance to ultra-violet (UV) radiation  |    | Meets the product standard's requirements.   |
| 10.2.5 Lifting  |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.6 Mechanical impact  |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.7 Inscriptions   |    | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances  |    | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock  |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components  |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections   |    | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors  |    | Is the panel builder's responsibility.   |
| 10.9 Insulation properties  |    |  |
| 10.9.2 Power-frequency electric strength  |    | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage  |    | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material  |    | Is the panel builder's responsibility.   |
| 10.10 Temperature rise  |    | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating  |    | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility   |    | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function   |    | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |

### **Technical data ETIM 6.0**

Low-voltage industrial components (EG000017) / Auxiliary contact block (EC000041)

Electric engineering, automation, process control engineering / Low-voltage switch technology / Component for low-voltage switching technology / Auxiliary switch block (ecl@ss8.1-27-37-13-02 [AKN342010])
