# Item # 373-E07-20-TY18-S21-230, 230 Volt (V) Voltage 373-E07 Electric Linear Actuator

The 373-E07 electric linear actuator is the preferred actuator for valve sizes from DN15 to DN125, based on process flows and pressures. With up to 1475 ft/lbs of torque and an array of options such as voltage type, stroke, speed, control, and auxiliary switches, you can configure one that meets your needs.
